# How Does COVID-19 Spread?

Keep Your Child Safe From COVID-19 Series

## How Does COVID-19 Spread?

Let's think and share!

How do you think **viruses spread**?

Note: Encourage children to discuss.

**Viruses** can **spread** in different ways. They are mostly **spread** through **droplets** when people cough or sneeze.

## How Does COVID-19 Spread?

When these **droplets** land on surfaces of things, people can catch the **virus** when they touch these things.

## How Does COVID-19 Spread?

The **virus** can enter their body when they use their infected hands to touch their mouth, nose or eyes.

## How Does COVID-19 Spread?

### Class Activity

Let's find out:

How do viruses spread easily and how do they make people fall sick?

## How Does COVID-19 Spread?

### Let's do (Experiment 1):

1. Place a handful of pom-poms in your hand. These pom-poms represent the droplets with viruses.
2. Pretend to cough or sneeze, sending the pom-poms flying in front of you.

## How Does COVID-19 Spread?

This experiment shows us how **viruses** can **spread** through **droplets** when people cough or sneeze.

## How Does COVID-19 Spread?

### Let's do (Experiment 2):

1. Apply some hand cream onto your palms and place your palms on the plate with tiny pieces of coloured paper. The tiny pieces of coloured paper represent the virus. Your hands are now infected with the virus.
2. Use your infected hands to touch different parts of your face but be careful of your eyes, nose and mouth!

## How Does COVID-19 Spread?

This experiment shows us that the **virus** can easily pass onto our face when we use our infected hands to touch our face.

## How Does COVID-19 Spread?

When the **virus** enters a person's body and begins to grow in numbers, it makes the person fall sick.
